

Plane Crazy Saturday!

Womens Role In Aviation History

By Barbara Schultz

April 19, 2025 – Mojave Air & Spaceport at Rutan Field

Barbara Schultz is a pilot, aviation historian and author. Her goal as an historian is to document the stories of the men and women who have contributed to the advancement of aviation. She has chronicled them in books, journal articles, and through participation in documentaries. After earning her pilot license in 1978, she met and married Phil Schultz, now retired Chief Pilot for General Electric. They have two sons who are both involved in aviation. One works at Stratolaunch; the other is a corporate pilot and DPE. The Schultz family lives on their own airport, Little Buttes Antique Airpark. They own several aircraft including a 1958 Beech 18, 1969 Bonanza V35A, 1943 Howard 250, 1969 Cessna, and several projects.
