

Plane Crazy Saturday!

Special Presentation by Cam Martin

‘The Bell X-1 and Supersonic Flight’

Cam Martin, will give us a behind-the-scenes look at the rocket-powered Bell X-1, Glamorous Glennis. Best known for making the first supersonic flight in level flight 78 years ago on October 14, 1947, piloted by Capt. Chuck Yeager. Cam's presentation covers the origins of the Bell X-1 program and concludes with some popular and enduring myths associated with this iconic machine.

Since retiring from the NASA Armstrong Flight Research Center, Cam has worked as a consultant supporting the work of the Mojave Air & Space Port at Rutan Field, the United States Space Force, and other regional aerospace activities. He serves each year as on-site volunteer chairman for the Experimental Aircraft Association's annual events in Oshkosh, Wisconsin.
