Cam Martin on set of "First Man" with X-15

2026 marks the 80th anniversary of the 1st flight of the historic supersonic Bell X-1 piloted by Bell test pilot Jack Woolams at Pinecastle, Florida. The Bell X-1 rocket plane now displayed in the Smithsonian's National Air & Space Museum, launched the era of the X-Planes, experimental U.S. vehicles used to explore and evaluate new technologies and aerodynamic concepts. Sequentially starting with the original Bell XS-1, this presentation traces the story of the dozens of X-Planes that have followed.

11:00 a.m. in MASP Board Room – seating limited!!!
