

Plane Crazy Saturday!

Special Presentation by

Dan Kreigh

RC Model Aircraft, his Lifelong Hobby

Dan will discuss his lifelong model aviation hobby and its impact on his aerospace career.

Dan has been working with Scaled off and on since 1988.

Model flying adventures range from Scaled Composites' SpaceShipOne, Freewing-Tiltbody UAV, and the famous Raptor (pilot seated externally on top).

Other stories outside of Scaled Composites include an airborne model rocket launch from a model towed glider based on a Burt Rutan patent, an inflatable SpaceShipOne, and dogfighting radio controlled models above guests at a black-tie SETP banquet ~2005.
